High Resolution Digital Files - \$500

Files have only basic retouching adjustments and are burned to a DVD with personal reprint rights. Jones & Company takes no responsibility for quality of images made from these files by outside sources. Please note: These files are included at no charge if you purchase a package that includes an album credit.

Wedding Album Options

Your Wedding album is a heirloom to treasure for a lifetime. At Jones & Company we enjoy working directly with our clients to create these priceless pieces. Each image that goes into an album is professionally retouched to enhance the beauty of the moment and laid out either with traditional matting or digitally designed pages. Because of the custom nature of this product, pricing varies and is dependent on number and size of pages, number of images, covers, etc. We will discuss these options in detail at our consultation to develop the perfect solution for your needs. All digital files are included when purchasing an album.

Traditional Albums

Traditional albums contain professionally retouched images of various sizes arranged and matted on pages with a variety of cover options.

Contemporary Albums

Contemporary Albums contain custom digitally designed pages printed on photographic paper and bound into a leather album.

Portrait Pricing

All portraits are digitally retouched to enhance the image quality and printed on either, professional photographic paper or canvas. Framing available at additional cost.
